Transit Future Action Plan

In 2012, the [Chilliwack Area Transit Future Plan](#) was completed. Since many of the projects identified in the 2012 plan are now complete, it is important that the transit priorities be updated to continue to guide decision-making over the next 25 years.

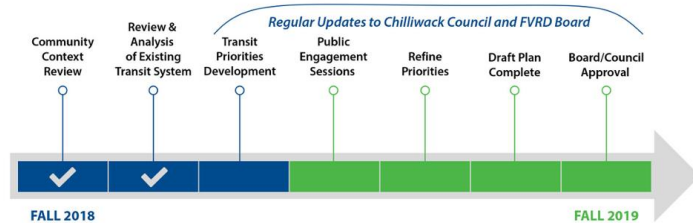

The Transit Future Action Plan will provide a vision for improving the region's transit network over the next 25 years by:

- Supporting local community goals and objectives
- Strengthening the link between transportation and land-use in order to achieve sustainable growth and development
- Identifying and prioritizing short and long-term transit improvement projects
- Developing service standards and performance guidelines which will assist in future decision-making processes
- Identifying a Transit Future Network that includes four layers of transit service tailoring transit to regional and local community needs:
 - Rapid transit
 - Frequent transit
 - Local transit
 - Targeted service

Where are We and Where Are We Going?
